

BRIEF SUMMARY

Highly motivated Bachelor of Technology in Computer Science and Engineering (Artificial Intelligence and Data Science) with a strong foundation in Python, Django, Machine Learning and Deep Learning. Passionate about AI-driven solutions and web development, with hands-on experience in various Machine Learning, Deep Learning and full-stack projects

KEY EXPERTISE

C C++ python HTML CSS Javascript Django Flask Machine Learning Deep Learning Git Github
PowerBi MySQL LLMs N8N

EDUCATION

Sagar Group of Institutions - SISTec

2022 - 2026

B.Tech. - Artificial Intelligence & Data Science - SISTec GN | CGPA: 7.17 / 10

Govt.H.S.Excellence School, Vidisiha, Vidisha

2022

12th | MPBSE | Percentage: 84.60 / 100

Govt . H.S Excellence School, Vidhisha, Vidisha

2020

10th | MPBSE | Percentage: 88 / 100

PROJECTS

TECHEducation

25 Jan, 2025 - 03 Mar, 2025

Team Size: 1**Key Skills:** Machine Learning Python Django HTML CSS Javascript SQLite**Project Link:** <https://github.com/aakashkushwah26/TechEducation>

TechEducation is a full-stack web application developed using Django, HTML, CSS, JavaScript, and SQLite. It enables students to explore and enroll in various courses while offering AI-powered career path recommendations through machine learning. The platform aims to guide students in making informed educational and professional decisions based on their interests and skills.

Student Mental Health Predictor

12 Oct, 2024 - 25 Dec, 2024

Mentor: Dr. Vasima Khan | **Team Size:** 4**Key Skills:** Machine learning Python Django HTML CSS JavaScript SQLite LLM**Project Link:** https://github.com/aakashkushwah26/Student_Mental_Health_Predictor_With_Chatbot

Mental health among students has become a growing concern, especially with the increasing pressures of academics, personal life, and societal expectations. This project aims to provide a machine learning-powered web application that predicts the mental health condition of students based on various parameters. By offering valuable insights into a student's well-being, the application serves as a proactive tool for students, parents, and professionals to take preventive measures and make informed decisions about mental wellness.

The Student Mental Health Predictor uses data collected through a survey (Google Form) to predict a student's mental health condition. The application incorporates a logistic regression multiclass classifier to categorize the mental health condition into different levels and presents the results in a user-friendly and interactive web application.

Retail Analysis -SQL Based Performance Evaluation

19 Jul, 2024 - 13 Nov, 2024

Team Size: 1**Key Skills:** SQL Database Data Analysis Decision-Making**Project Link:** <https://github.com/aakashkushwah26/SQL-RETAIL-ANALYSIS>

Conducted a detailed retail data analysis using SQL for an e-commerce platform to enhance performance and drive business strategy. Identified top-selling products by year, measured key performance indicators (KPIs), and analyzed user activity. Delivered concise reports with actionable insights, supporting data-driven decisions for app optimization, customer engagement, and improved sales outcomes.

AI-Based Ayurvedic Plant Identifier and Medicine Recommender System

Mentor: Prof. Ruchi Jain | **Team Size:** 3

Key Skills: Deep Learning Python Django HTML CSS Javascript API SQLite YOLOv8

Project Link: https://github.com/aakashkushwah26/AI-Based-Ayurvedic_plant_Identifier_and_Medicine_Recommender_System

AI-Based Ayurvedic Plant Identifier & Medicine Recommender is an innovative web-based system that uses deep learning to identify Ayurvedic medicinal plants from images. Powered by a YOLOv8 model and built with Django, the platform allows users to upload plant images, detect their species, and receive herbal medicine suggestions along with their uses. It offers a user-friendly interface, real-time detection, and an admin panel to manage data efficiently. Merging ancient Ayurvedic knowledge with modern AI, this solution aims to make herbal healing more accessible and accurate through intelligent plant recognition and targeted medicinal insights.

ACHIEVEMENTS

- Completed the 12-week NPTEL course "Introduction to Machine Learning" conducted by IIT Madras from Jan to Apr 2025.

ASSESSMENTS / CERTIFICATIONS

The joy of Computing using python 01 Apr, 2024

Aggregate: 58 / 100

Key Skills: python

Completed the 12-week NPTEL course "The Joy of Computing Using Python" conducted by IIT Madras from Jan to Apr 2024. Scored a consolidated 58% with full marks in assignments. Learned core programming concepts in Python including data types, loops, conditionals, and functions, along with an emphasis on logical thinking and problem-solving.

Data Base Management System 07 Sep, 2024

Aggregate: 68 / 100

Key Skills: Data Base Management System SQL

Completed the 8-week NPTEL course "Database Management System" conducted by IIT Kharagpur from Jul to Sep 2024. Scored a consolidated 68%, earning an Elite certificate with strong assignment performance (21.25/25). Gained a solid foundation in relational databases, SQL, ER modeling, normalization, transactions, and indexing. Developed practical skills in designing and querying databases.

Introduction to Machine Learning

Aggregate: 70 / 100

Key Skills: Machine Learning

Completed the 12-week NPTEL course "Introduction to Machine Learning" conducted by IIT Madras from Jan to Apr 2025. Scored a consolidated 70% with strong performance in assignments (23.6/25). Gained foundational knowledge in machine learning concepts including supervised and unsupervised learning, model evaluation, regression, classification, and neural networks. Emphasis was placed on mathematical understanding and practical implementation.

CO-CURRICULAR ACTIVITIES

- Participated in Samadhan 1.0 at AI based Chatbot Hackathon SISTec-GN (2024)
- Participated in Smart India Hackathon at SISTec-GN (2024)

EXTRA CURRICULAR ACTIVITIES

- Participated in Vionnet SISTec Fiesta at SISTec-GN, Bhopal and secured 1st rank (2024)

PERSONAL INTERESTS / HOBBIES

- Watching Cricket
- Listening to music
